PROFILE

Enthusiastic and detail-oriented Computer Science graduate with a strong foundation in web development and technical support. Skilled in JavaScript, React.js, Node.js, and API integration, with hands-on experience building responsive applications and troubleshooting real-time issues. Adept at working in collaborative team environments, with a proven ability to communicate effectively and learn quickly. Passionate about solving problems, supporting users, and contributing to scalable, real-world software solutions.

EDUCATION

BSc in Computer Science and Engineering, International Islamic University Chittagong 2025
CGPA: 3.304 out 4.00

SKILLS

Technical Skills	MERN Stack (MongoDB, Express.js, React, Node.js), API troubleshooting, HTTP request/response analysis, System integration basics, SDLC knowledge, Business documentation, Analytical reporting
Soft Skills	Effective communication (Conversational English), Customer support, Conflict resolution, Negotiation, Time management, Team collaboration, Attention to detail, Ability to work under pressure
Tools	JIRA, Microsoft Office Suite (Word, Excel, PowerPoint), Microsoft Teams, Skype, Google Meet, Version control (Git workflow)

PROJECTS

ABC Movies App: A React.js-based front-end movie listing website that fetches data from the TMDB (The Movie Database) API. Features a responsive UI with dynamic movie listings and a real-time search bar using react-use-debounce to optimize API calls. Currently working on the backend to track and display trending movies based on user interactions. ([Click to visit](#))

Social Media App: Built a full-stack social media application that allows users to upload images to Cloudinary, update captions, and delete posts. Implemented JWT-based authentication for secure user login and protected routes. Users can set their posts to public or private, and the app dynamically displays content based on visibility settings. ([Click to visit](#))

plainB Ecommerce: Developed a full-featured ecommerce platform that displays products with dynamic quantity-based cart functionality. Integrated a secure payment gateway using SSLCOMMERZ and implemented OTP verification via email for user validation. Used JWT-based authentication to protect user data and checkout routes. The backend was built with Node.js, Express.js, and MongoDB using Mongoose for efficient data handling. ([Click to visit](#))

Task Manager: Developed a task management app with CRUD operations, user registration, OTP email verification, and password reset. Secured routes using JWT authentication and built the backend with Node.js, Express.js, MongoDB, and Mongoose. Integrated Nodemailer for emails and followed MC architecture within the MERN stack. ([Click to visit](#))

CERTIFICATIONS

- | | |
|--|---------------------|
| • Full Stack Web Development with MERN | Ostad |
| • 21 Days of Code - A Web Development Bootcamp | Programming Hero |
| • Responsive Web Design | freecodecamp |
| • Spoken English and Leadership Course | poetic english zone |

TECHNOLOGIES

Languages JavaScript, C++, C, Python

Technologies Node JS, Express Js, MongoDB, Mongoose, React JS, Postman, MySQL, JWT, NPM, Next Js
